

INVESTMENT OBJECTIVE

The Anchor BCI Diversified Stable Fund is a multi-managed cautious risk profile portfolio with the objective being to provide investors with a high level of income and capital stability. This Fund is appropriate for clients who want exposure to Anchor's capabilities in a solution that is appropriately blended and diversified with other offerings to ensure a more consistent return profile.

INVESTMENT PHILOSOPHY

The portfolio will be managed in compliance with prudential investment guidelines for retirement funds in South Africa to the extent allowed for by the Act. To provide a limited level of capital protection, the portfolio's equity may be as high as 40% of the portfolio's net asset value. In order to achieve its objective, the investments normally to be included in the portfolio may comprise a combination of assets in liquid form, money-market instruments, interest-bearing securities, bonds, debentures, corporate debt, equity securities, other interest-bearing securities, property securities, preference shares, convertible equities and non-equity securities. The portfolio may, from time to time, invest in listed and unlisted financial instruments. The manager may also include forward currency, interest rate and exchange-rate swap transactions for efficient portfolio management purposes.

Asset class returns

Both the equity and listed property markets rebounded strongly from the losses suffered in 1Q18, returning 5.4% and 7.7% for April, respectively. The rally meant that equities had recovered most of the YTD losses and are down only 0.9%. Conversely, bonds were down 0.7%, mainly due to a 5.2% weakening in the rand vs US dollar exchange rate and a sell-off in US bonds. Cash yielded 0.5%.

Drivers of returns:

All equity sectors delivered positive returns with the resource sector being particularly strong, rallying 9.4%. The industrial sector returned 5.8%, whilst the financial sector gained 3.0%, the latter being held back by the weak rand.

The best-performing stocks in the Top-40 were rand-hedge stocks that generate a portion of their earnings in foreign currency. Some standout performers were NEPI Rockcastle (19.6%), Mediclinic (15.5%) and BHP Biliton (13.1%). The worst-performing stocks were mostly local retailers like Truworths (-4.7%), Foschini (-3.9%), and Mr Price (-3.9%).

The Anchor Diversified BCI Stable Fund appreciated by 2.0% in April and outperformed the category average, which was up 1.9%.

Strong gains in market heavyweights including BHP Billiton, Richemont and Naspers, all of which account for about one-third of the JSE's total market cap, meant that active managers generally underperformed the index in April. The FTSE/JSE All Share Index advanced by 5.4% and all of the underlying equity funds finished the month in positive territory. The Prudential Dividend Maximiser gained 5.0% and was the best-performing manager for the month. The Satrix Capped Swix All Share Fund, which tracks the FTSE/JSE Capped Swix All Share Index, was up 4.0%. Both Perpetua SCI Equity and Anchor BCI Equity advanced by 3.8% and 3.7% MoM, respectively. The Sanlam Small Cap Fund appreciated by only 0.2%.

The GinsGlobal Global Equity Index Fund gained 1.7%, whereas the iShares Core MSCI Emerging Markets ETF lost 0.3% (in dollar terms). The weakening in the rand vs dollar exchange rate (-5.3%) improved the performance of the offshore funds, which ended the month up 7.1% and 5.0%, respectively (in rand terms).

Bond funds struggled from a weakening rand in spite of a 1% increase in VAT. The All Bond Index depreciated by 0.7%, whilst the STANLIB ALBI Bond Index Tracker and the Sanlam Select Bond Plus lost 1% and 0.5% MoM, respectively.
