

## PROFILE AND OBJECTIVE

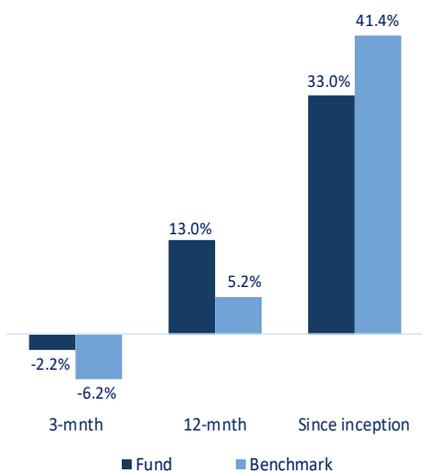

The Aspirant Offshore Equity Portfolio is a concentrated version of Anchor Capital's High Street Equity Portfolio. Due to the long-term view taken in constructing the portfolio, there will be periods where it may differ from the Anchor Capital portfolio. The portfolio is therefore an aggressive equity portfolio, tailored to the needs and risk profile of young professionals. The portfolio invests in global-listed businesses and is ideal for young investors looking to take on a higher degree of risk, in search of potentially high returns.

The objective of the portfolio is to maximise total returns (predominantly via capital growth) for investors over the long term. The portfolio takes a long-term view and aims to outperform the MSCI World Index over a rolling 2-year period. Short-term volatility is to be expected and the portfolio is therefore suitable for investors with a time horizon of at least 5 years. The portfolio is constructed from bottom-up, fundamental research with an investment philosophy that favours quality stocks with superior returns on capital, cash flows and pricing power.

The first half of February saw developed market (DM) stocks recover quickly from the sell-off at the end of January to reach new record highs. S&P 500 counters wrapped up reporting 4Q19 earnings, which were slightly ahead of muted expectations. It was only really the assets most directly impacted by the novel coronavirus (COVID-19) outbreak in China (e.g. oil and travel-related companies), which were still negatively affected. However, that all changed dramatically in the last week of the month as it became clear that the virus was starting to spread meaningfully beyond China and Asia, with Italy reporting c. 1,100 confirmed cases and 29 deaths related to the virus by the end of February. The US stock market recorded its worst week since the global financial crisis, dropping by 11% in the last week of February as DM stocks fell by 10.8% and erased all the gains made in the second half of 2019.
