INVESTMENT OBJECTIVE

The **Anchor BCI Equity Fund** is a general equity portfolio that seeks to sustain high long-term capital growth.

INVESTMENT PHILOSOPHY

The portfolio is constructed from bottom-up, fundamental research with an investment philosophy that favours quality stocks with superior returns on capital, cash flows and pricing power. While acceptable valuation is an important component of the stock-selection process, the fund's style is not "value" – investments will be made in premium-rated stocks where the growth outlook and quality profile warrants it. The fund will also own shares that are often not well researched, yet offer exceptional valuation-driven opportunities. The quality of companies included is judged by rates of earnings growth, return on capital employed, cash conversion and stability of margins. The portfolio may, from time to time, invest in listed and unlisted financial instruments. The manager may include the following unlisted financial instruments: forward currency, interest rate and exchange-rate swap transactions for efficient portfolio management purposes. The portfolio's equity exposure will always exceed 80% of the portfolio's net asset value.

FUND MANAGER COMMENTARY AT 29 FEB 2020

The Anchor BCI Equity Fund ended February 7.7% lower vs the FTSE/JSE Capped Swix All Share which was down 9.5% MoM, taking its YTD loss to 11.9%. Finance Minister Tito Mboweni, delivered his much-anticipated budget speech in February, generally exceeding expectation with limited resources and pressure from all sides. He left taxes largely unchanged, recognising the already high burden on South African taxpayers and choosing instead to take on the powerful labour unions with a plan to cut R160bn from the state wage bill over the next 3 years. Unfortunately, the budget speech was delivered against the backdrop of global risk aversion related to the economic impact of the new coronavirus and the global sell-off overwhelmed any positive impact the budget may have had on local asset prices. The rand continued to sell off with other emerging market (EM) currencies, ending the month 4% lower against the US dollar. A slew of top-40 companies reported earnings in February, most of them mining companies. Mining company earnings were generally disappointing, weighed down by either commodity prices or, in the case of iron ore and platinum group metals, where commodity prices were strong, volumes generally disappointed. Woolworths and Shoprite also reported decent results in their SA food businesses during February, with satisfactory food price inflation. However, their offshore businesses continued to disappoint and for Woolworths, its local clothing business was also disappointing.
