

#### PROFILE AND OBJECTIVE

This fund invests in the JSE and OTC-listed BEE schemes. These instruments are typically geared and trade at discounts to their intrinsic value. At present, they can only be traded by qualifying investors (51% black-owned). As debt gets paid down and the discount narrows as they become freely traded (2016-2018), there should be an appreciable rise in the share prices, assuming increases in the underlying shares.

#### STRUCTURE

Black investors can invest in Shumba (Pty) Ltd, which owns 51% of the underlying investment company. Shumba shareholders are rebated 75% of performance fees of the total investment. White investors can invest in Ngala (Pty) Ltd, which owns 49% of the underlying investment company.
